

# Confidential destruction

*Secure, certificated and 100% landfill diversion*

One of our main services is the safe handling and destruction of sensitive, out of date stock and damaged goods, helping to protect your brand. Using a number of on-site processing techniques, we are able to achieve complete brand and product destruction with maximum landfill diversion.

We can deal with large volumes of packaged materials such as foods and drinks with complete confidentiality and certified destruction – end-to-end with our own fleet.

- ✓ Fully manned, secure site
- ✓ High-end CCTV system with 24/7 access
- ✓ BS EN 15713:2009 accredited
- ✓ Double-locked storage & processing areas
- ✓ Owned transport fleet
- ✓ Fully documented destruction

## Secure from end-to-end

Our destruction management system accreditation means you can be confident that the service you receive is secure and confidential from start to finish. From the collection and transport to the destruction, recovery and recycling of all wastes, your materials pass through our fully documented and bespoke processes.

- Fleet vehicles tracked at all times
- Secure seal, locked and tagged transport
- Paperless weigh tickets, photographs and transfer notes
- Real-time CCTV footage and waste status
- Destruction certificates

## Instant destruction

When instant destruction is required, we provide a fast destruction service using our high-speed shredding systems.

These systems are able to handle waste directly from a wagon or trailer without the need for manual handling.

Require a specific process or measure? Just let us know your requirements.

## Confidential destruction

Secure, certificated and 100% landfill diversion

We are able to accept and process a whole range of goods and products for confidential destruction, including:

- ✓ Food products in glass jars
- ✓ Pharmaceutical products
- ✓ Cosmetics/cosmetic washings
- ✓ Packaging materials
- ✓ Documents and paperwork
- ✓ Alcohol

### Destruction, recovery and recycling

Materials are dealt with to the customer's requirements from the moment they leave their site. Our team takes control of the material on-site by processing through a series of de-packaging equipment, shredders and screeners. The aim is to not only completely destroy the brand and product, but to also recover and recycle each waste type to achieve full landfill diversion.

The organic fractions are used for composting and feeding our anaerobic digestion (AD) Plant, while the packaging – now in an unrecognisable and non-reusable form – is shredded or baled and sent for final processing. Plastics are granulated at our own facility and paper, card and metal are sent to the end-user for recycling.

#### Full recovery or total destruction

Dependent on your requirements, we are happy to provide the option for total destruction.

Please get in touch for further info.

Our security measures ensure that your company, product and brand are safe in our hands and your duty of care and environmental responsibilities are fulfilled.
